MEMORANDUM FOR: JJH ~~4/1~~ M  
John:  
I have been unsuccessful  
in obtaining an answer out of  
Hand to the attached. I  
am not sure it is any great  
loss but time does seem to  
have passed it by.  
File and forget it.

MEMORANDUM FOR: Director, National Photographic  
Interpretation Center

SUBJECT : OSR Research Program for the Coming  
Year

1. The attached OSR Research Program presents both scheduled intelligence production and exploratory research for FY 1971. The research program is reviewed semiannually in June and December, and projected for the following twelve months.

2. The program is a guide to what we intend to do rather than a prescription for what we shall do. As with previous issuances, I invite your comments about what we propose so that OSR can better shape its research to meet the needs and complement the efforts of other components. I am especially interested in those areas where a joint effort or some other form of collaboration would enhance the utility of the final product.

3. The category "exploratory research" includes those areas in which we think useful data may exist or new approaches may be fruitful even though we cannot say whether a publishable product will result.

4. Most of the scheduled projects listed for the first half of FY 1971 are well under way, and I would hope to receive any comments on them soon. Comments on those listed for the last half of FY 1971 will be taken into account during the semiannual review this December.
